# ABOUT TRASCAR

Located in the immediate outskirts of **Modena**, Trascar is structured on an area of approx. 6.000 square meters, where the **integrated logistics systems** are entirely designed, assembled and tested before final shipment.

Trascar can create automatic **palletizing** systems, **transport** systems, automatic industrial **warehouses**, **picking** and final **dispatching** solutions.

For any need in the field of industrial automatic handling, Trascar can develop a **dedicated** and **high-quality project**.

After the final installation, our Service remains available for any request.

Since 2013 U.T.I.T., a company specialized in the construction of automation systems **including** the **Textile** and **Pharmaceutical Lines** sectors, has become part of Trascar.
